Profile

10 years as software developer. In 2013 I started to work with Android platform and also started my mobile developer career. Since 2016, I started to work with iOS development too. My most recent projects are in iOS platform.

All my professional career is focused on big tech projects, from TELCO to banks passing through woman's health and retail projects in Brazil and in US.

Employment history (dev mobile only)

Senior iOS Developer, GO. K

Since Apr 2020

As a iOS developer, I was part of a team responsible for the banking app which was a part Objective-C part Swift, solution built to help regular people to have full digital banking account. I was responsible for building and maintaining this iOS app that was meant to be, among other things, a complete banking solution. Also, I was in charge of being a iOS Tech-Lead of my colleagues here in the organization.

Senior Mobile Application Developer, R/GA Brazil

Jan 2019 - Mar 2020

As a iOS developer, I was part of a team responsible for the woman's health app which was all in Swift, solution built to help women to track period and birth control. I was responsible for building this iOS app from scratch. Also, I was in charge of being a iOS Tech-Lead of my project colleagues.

Senior Mobile Developer, BRQ Brazil

Mar 2018 - Jan 2019

As a iOS developer, I was part of a team responsible for the banking app which was a part Objective-C part Swift, solution built to help companies to have full digital banking account. I was responsible for building and maintaining this iOS app that was meant to be, among other things, a complete banking solution.

Senior Mobile Developer, Livetouch

Sep 2017 - Mar 2018

As a iOS developer, I was part of a team responsible for the insurance app which was all in Java (Android) and Swift (iOS), solutions built to help regular people to have insurance products (car, house, life, etc.). I was responsible for building and maintaining these apps that was meant to be, among other things, a complete insurance solution.
